

Lecture Notes in Mathematics

This series reports on new developments in mathematical research and teaching – quickly, informally and at a high level. The type of material considered for publication includes

1. Research monographs
2. Lectures on a new field or presentations of a new angle in a classical field
3. Summer schools and intensive courses on topics of current research.

Texts which are out of print but still in demand may also be considered.

The timeliness of a manuscript is sometimes more important than its form, which might be preliminary or tentative.

Details of the editorial policy can be found on the inside front-cover of a current volume.

Manuscripts should be submitted in camera-ready form according to Springer-Verlag's specification: technical instructions will be sent on request. $\text{T}_\text{E}\text{X}$ macros may be found at:

<http://www.springer.de/math/authors/b-tex.html>

Select the version of $\text{T}_\text{E}\text{X}$ you use and then click on "Monographs".

A subject index should be included.

We recommend contacting the publisher or the series editors at an early stage of your project. Addresses are given on the inside back-cover.
